

Application Performance Optimisation and Architectural Review

Boost efficiency and reduce costs of ownership through promotion of high-performance applications.

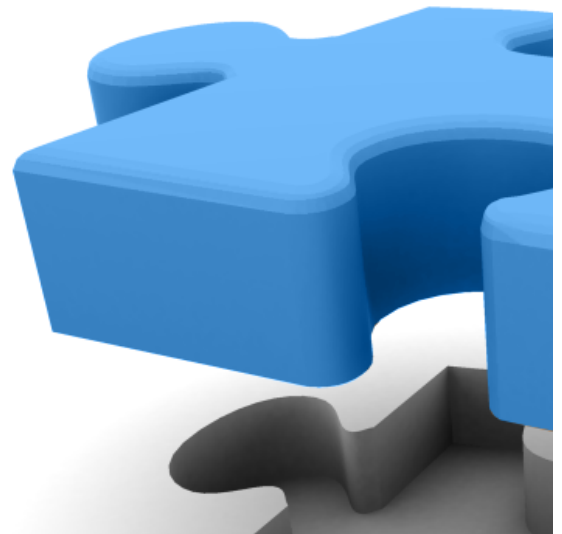

For legacy applications ICS applies a great deal of attention and effort to constantly seek ways to improve existing performance and prevent future degradation of performance. ICS's development process is test driven ensuring that code is constantly tested both functionally and optimally. ICS works with clients to define performance metrics over a range of areas such as client side responsiveness, bandwidth utilisation and memory usage etc. This ensures that scalable, reliable and high performance applications are delivered. ICS uses the latest in memory profilers, performance monitors and tools to identify bottlenecks and issues in application and database code and design.

Deliverables

The Quick Start Package for legacy application consultancy is a 5-10 day package with at least 50% on-site consultancy. ICS will undertake a detailed analysis of the application's architecture, interfaces, data-sources and key processes. Access to key business users and IT personnel will be necessary. Following the on-site consultancy ICS will produce a vision document with recommendations that tackle the area of Application Performance Optimisation.

The Quick Start Package starts from £3995*

*Price is exclusive of expenses and VAT.

Application Development Expertise

A Microsoft Gold Partner, ICS is a leading technical consultancy specialising in Custom Application Development and Support for Mid-market and Enterprise organisations using Microsoft and Oracle technologies.

Our consultants are experts in the installation, configuration, design, development and deployment of:
